CXT Cost-Saving, Revenue-Generating Concession Unit Added to Popular Concrete Restroom Pre-plumbed, Pre-Wired CXT® Concrete Building Delivered to Site Ready-to Use

PITTSBURGH, PA, August 21, 2009 – L.B. Foster Company (NASDAQ: FSTR) of Pittsburgh, PA has announced that its wholly owned subsidiary, CXT, Inc. has re-engineered its popular two, three and four section precast concrete restroom to accommodate the addition of a cost-saving, revenue-generating concession unit. The new concession section raises CXT restrooms to a unique alternative solution for government agencies and commercial customers adjusting to the current economic climate. The combination of two important applications in this single building minimizes the structure's footprint, reduces installation costs and provides important revenue opportunities.

“The innovative engineering of the CXT restroom/concession combo units provides customers with a valuable solution in this difficult economy,” said Gary Burger, CXT Concrete Buildings National Sales Manager. The most popular unit, the Malibu is a multi-user flush restroom with an attached concession section in a fully contained, vandal-resistant concrete structure. This new building is prefabricated and delivered ready-to-use with preinstalled plumbing and electrical where applicable. CXT restrooms are available in a variety of section multiples, exterior textures and site-specific colors.

CXT Concrete Buildings is North America's leading manufacturer of concrete restroom, shower and concession buildings. The roof and walls are fabricated with high strength precast concrete to meet all local building codes and textured to match local architectural details. All CXT buildings are designed to meet A.D.A. requirements and withstand snow, wind and seismic design category E earthquakes. The all concrete construction makes the buildings easy to maintain and provides resistance against the rigors of vandalism.
