

PRECAST CONCRETE PRODUCTS

Precast Concrete Box Culverts

Strong. Versatile. Built to Last.

ENGINEERED STRENGTH—PROVEN PERFORMANCE—LASTING VALUE

CXT® precast concrete box culverts offer wide-ranging capabilities and can be manufactured in a variety of sizes to meet the demands of a variety of infrastructure projects. Engineered for performance and reliability, our box culverts provide strength, durability, and long-term value across a broad range of applications. Manufactured with superior quality standards, our precast concrete box culverts are designed to be both durable and cost-efficient.

Precast concrete box culverts deliver unmatched quality, uniformity, and adaptability. Their robust construction makes them ideal for projects requiring dependable structural performance and long service life. CXT box culverts are commonly used for:

- > Water conveyance
- > Short-span bridges
- > Tunnels and underground passages

Designed to withstand demanding conditions, precast box culverts provide decades of high-quality service with minimal maintenance. In addition, precast construction allows for quick and efficient installation, helping reduce on-site labor, construction time, and overall project costs.

ADVANTAGES

- > Durable concrete construction for long-term performance
- > Consistent, uniform quality through precast manufacturing
- > Cost-efficient solution with reduced installation time
- > Available in multiple sizes and configurations

APPLICATIONS

Precast concrete box culverts are a versatile solution for a wide range of civil, transportation, and utility projects, including:

- > Extension of existing box culverts
- > Groundwater recharge systems
- > Highway culverts
- > Jacked or tunneled installations
- > Livestock, pedestrian, or golf cart under-crossings
- > Railroad culverts
- > Short-span highway bridges
- > Storm drains
- > Replacement of existing open channels or ditches, enabling land to be used more productively
- > Underground stormwater retention systems
- > Utility tunnels

PRECAST CONCRETE BOX CULVERTS

Built for Reliability – Designed for Efficiency

A RELIABLE INFRASTRUCTURE SOLUTION

Precast concrete box culverts offer a strong, adaptable, and long-lasting solution for infrastructure challenges. From efficient stormwater management to safe crossings and tunnels, CXT culverts are engineered to perform, and provide decades of reliable service with minimal maintenance.

Manufactured under strict quality standards, our precast concrete culverts offer exceptional durability, long service life, and cost efficiency.

CXT manufactures a variety of precast concrete box culverts at three of our strategically located NPCA certified plants in Hillsboro, Texas, Loudon, Tennessee, and Williamstown, West Virginia.

CXT Incorporated, a subsidiary of L.B. Foster Company, manufactures precast concrete buildings and other pre-stressed, precast concrete products for infrastructure and construction projects.

For over 38 years, we have proudly served as a leading precast concrete manufacturer, delivering top-quality products to meet a wide range of industry needs across the United States.
