We innovate to solve global infrastructure challenges

Custom Quality Protective Coatings

Willis, TX

Scan the QR code to visit our website.

L.B. Foster offers fusion bonded-expoy coatings for the interior and exterior of steel water pipe and oil & gas markets. Our Willis facility has the unique capacity to coat 1/2 in. to 74 in. pipe, as well as induction bends, forged fittings, tees, pups, and spool pieces, all on one site with numerous coating options.

- Corrosion protection for long-term pipeline integrity
- Abrasion-resistant overcoatings for harsh installations
- Internal flow coatings to improve efficiency and throughput
- Asset integrity solutions across the full energy delivery path

What sets us apart

- Speed and flexibility -- from large transmission projects to expedited short runs, we meet aggressive timelines.
- Custom capabilities -- tailored coating solutions for unique project needs.
- Full-service scope -- coating for pipe, bends, risers, fittings, spool pieces, and more.
- Single-source efficiency -- multiple coating systems applied in one facility.

Advanced Coating Solutions

L.B. Foster's services are not just limited to straight line piping; we also offer coating solutions for risers, spool pieces, fittings, and bends, with custom processes and a vast array of product applications.

We offer a broad portolio of high-performance coatings:

Fusion Bonded Epoxy (FBE)
One-part, heat-curable, thermosetting epoxy powder designed for corrosion protection of pipe.

Abrasion Resistant Overcoating (ARO & MRO)
Applied to FBE coated pipe to offer additional protection. Two-layer system ideal for tough installations, such as directional drilling and exposed river crossings.

Internal Lining (ID) Speciality Coatings
Durable internal lining that increases the efficiency of flow over long stretches of pipelines. It provides an excellent anti-corrosion protection on pipe, both in storage and during installation. We offer NSF Certified Coatings upon request.

Liquid Epoxy Specialty Coatings
Liquid epoxy coatings applied to pipe, valves, fittings, and bends with innovative plural component liquid spray equipment.

Fabricated Products

Line Pipe Equipment

Our North Houston facility delivers versatility, scale, and speed:

- Coating capabilities from 1/4" to 74" diameter pipe.
- Handles pipe, induction bends, forged fittings, tees, pups, and spools.
- Advanced equipment for high-volume and custom applications. Designed for rapid turnaround without compromising quality.

At the heart of L.B. Foster's business philosophy is acute attention to customer service and quality. There is no job too small, or needed too quickly for our Willis, TX operation.

Why Choose L.B. Foster?

- Fast, flexible solutions for any project size
- Superior corrosion protection inside and out
- Built to withstand tough installations
- Custom coating expertise across a wide range of components
