L.B. Foster Commercial Decking

Commercial Decking

L.B. Foster's commercial structural steel decking is ideal for special design applications, tight construction schedules, and quick installation processes.

A Deck (Narrow Rib) Roof Deck

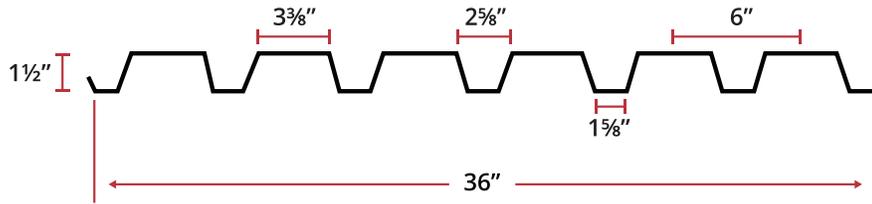

- > 1.5" Depth
- > Galvanized or painted finish
- > Gauges Stocked:

- > Used with smaller insulation, small spans, and lighter duty applications. Typically found on older buildings, mostly re-roof & repair situations. Support lightweight concrete and waterproof membrane.

B Deck (Wide Rib) Roof Deck

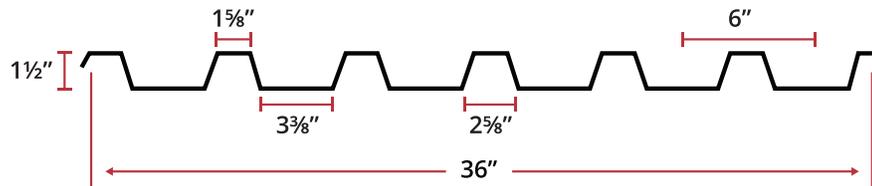

- > 1.5" Depth
- > Galvanized or painted finish
- > Gauges Stocked:

- > Most widely used decking in the commercial space for new construction. Used with wider/larger insulation, long spans, and heavier weight requirements. Best strength to weight ratio. Support lightweight concrete and waterproof membrane.

1.5" Form Deck

- > 1.5" Depth
- > Galvanized finish
- > Gauges Stocked:

- > Used for floors, stairways, and other commercial or residential spaces.
