

Specialty Coatings and Fittings

Custom Expedited and Emergency Coatings for Pipe, Fittings, Risers and Fabricated Steel

MARKET

Water/Wastewater

AVAILABLE

North America

L.B. Foster offers protective coatings for more than just straight line pipe. We also provide a wide range of specialty coatings including internal/external corrosion and abrasion protection for pipe, fittings, risers, vessels and fabricated steel in quantities from one to thousands.

We offer fusion-bonded epoxy (FBE) coatings for the interior & exterior of steel water pipe, special sections, welded joints, connections and fittings for steel water pipelines installed underground or underwater.

L.B. Foster applies FBE coatings that exceed all industry pipe coating standards. This protective coating is a one-part, heat curable, thermosetting epoxy powder designed for corrosion protection of pipe.

We offer a vast array of custom coating solutions to a wide range of products. We have the unique capability to coat 1/4 in. to 74 in. pipe, as well as induction bends, forged fittings, tees, pups and spool pieces, all on one site with numerous coating options.

L.B. Foster strives to maintain the fastest turn times in the industry. The maturation of our Willis, TX, operation

Custom pipe being coated to AWWA's C213 specification

has allowed us to serve our existing customer base in a new market segment, from planned long distance lines to quick turnarounds for more immediate construction projects.

At the heart of L.B. Foster's business philosophy is acute attention to customer service and quality. There is no job too small, or needed too quickly, for our Willis, TX, operation.

KEY BENEFITS

- Quick Turn
- Short Lead Times
- FBE provides excellent adhesion resulting in long lasting corrosion protection
- FBE provides excellent abrasion and impact resistance
- FBE's smooth, hard coating surface reduces friction and buildup than most other coatings, leading to more efficient flow
- FBE's thin and lighter coating helps reduce weight during handling and installation

CAPABILITIES

- ID Coating 6" – 74"
- OD Coating 1/4" – 74"
- ID/OD Coating 6" – 74"
- Max Length 48 ft
- Powder Coated
- Liquid Coated
- Fusion Bonded Epoxy (FBE)
 - 3M Scotchkote
 - Sherwin Williams,
 - SPC – Special Polymer Coatings
 - Denso
